

(a)

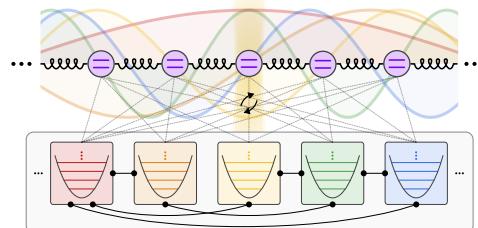

Hybrid CV-DV Quantum Processors

Superconducting

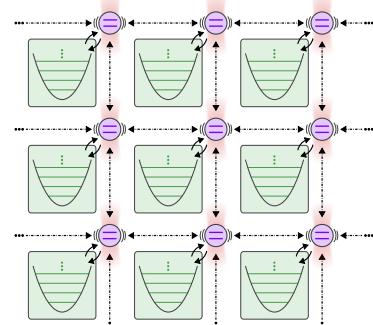

- Microwave resonator
- Superconducting qubit
- Dispersive interaction

Trapped ion

- Collective motional modes
- Ion qubit
- Sideband interaction

Neutral atom

- Atomic motional modes
- Neutral atom qubit
- Sideband interaction

Oscillator

Qubit

Computational components

Oscillator-qubit

Oscillator-oscillator
(beamsplitter)

Qubit-qubit

Native interactions

(b)

AMM 1: Qubit centric

Long-range connectivity
through auxiliary bosonic modes

AMM 2: Oscillator centric

Boson sampling and simulation
of interacting boson models

AMM 3: Hybrid oscillator-qubit

Hybrid algorithms and simulation of
physical models w/ spins and bosons

Hybrid oscillator-qubit hardware layer
